# LALIT

Noida, Uttar Pradesh | +91-8309916730 | lalit2086@gmail.com | linkedin.com/in/lalit-2086274374

## PROFESSIONAL SUMMARY

BCA student and self-taught full-stack developer with hands-on experience building production-ready systems using React, TypeScript, Next.js, and Supabase. Experienced in AI-powered application development, API design, admin panel creation, and third-party integrations. Passionate about leveraging AI tools to accelerate workflows and deliver clean, scalable results.

## TECHNICAL SKILLS

**Languages & Frameworks:** JavaScript (ES6+), TypeScript (strict mode), Python (learning), HTML5, CSS3, React.js, Next.js 14, Tailwind CSS, Node.js
**Backend & Database:** Supabase (PostgreSQL), REST API design, JWT authentication, Row-Level Security (RLS), Serverless Functions, EmailJS
**AI & Automation:** LLM integration, AI-powered application development, prompt engineering, AI workflow automation
**Data & Tools:** Structured data processing, JSON/CSV, Git & GitHub, VS Code, Vercel deployment, API endpoint testing
**Web Concepts:** Responsive design, cross-browser compatibility, scalable architecture, rate limiting, idempotency, cloud storage

## PROJECTS

**Personal Portfolio Website** — lalit-portfolio-tau.vercel.app
*React | TypeScript | Tailwind CSS | Supabase | EmailJS | Vercel | 2026*

- Built a full-stack personal website with Home, Skills, Projects, and Contact pages using a unique nitro pixel aesthetic (Press Start 2P font).
- Integrated Supabase for database and cloud storage — handling authentication, project management, and resume uploads.
- Built a secure admin panel for real-time project management and resume uploads without touching the codebase.
- Integrated EmailJS enabling visitors to send messages via a working contact form; deployed on Vercel with full mobile responsiveness.

**SOLVO — AI-Powered Career Guidance Platform**
*Next.js 14 | TypeScript | Supabase | PostgreSQL | Vercel | 2026 – Present*

- Designed a psychometric assessment engine based on the Big Five personality model with dynamic trait calculation, reverse scoring, normalization (0–100 scale), rate limiting, and idempotency protection.
- Built a CAT-style aptitude test engine with 30 MCQs, automated answer-key validation, category-wise score breakdown, and structured error handling.
- Implemented Supabase authentication with JWT sessions and Row-Level Security (RLS) for user-specific data isolation.
- Created dashboard APIs aggregating profile, psychometric, and aptitude data with premium content gating for future monetization.

**BookBazar — Online Bookstore** — lalit2004.github.io/BookBazar
*HTML5 | CSS3 | JavaScript | GitHub | 2025*

- Designed a fully responsive bookstore interface with book catalog display and search-based filtering.
- Applied mobile-first design principles with cross-browser compatibility; managed via Git and GitHub.

## EDUCATION

**Bachelor of Computer Applications (BCA)** — IGNOU | Expected 2027
Senior Secondary (12th) & Secondary (10th) — NM Public School, Noida
